**Hosted at Connected
Places Catapult**

CATAPULT
Connected Places

EVENT OVERVIEW

UK and international Digital Twin Hub community members will convene to explore the latest cross-industry, business applications of digital twins that are creating impact and ROI. Join 350+ senior-level policymakers, corporate asset owners, solution providers, academics, and investors to experience live demonstrations and interactive showcases, and gain access to new tools to enable business decisions.

Benefits of attending

- **Learn about the latest outputs and tools** to enable collaboration across industries
- **Explore applications of digital twin technology** across multiple sectors and learn from peer experiences including water, energy, rail, aviation, maritime, road, built environment, defence, nuclear and other key industries
- **Discover how to assess ROI and empower business decisions** involving digital twins
- **Network with over 350 (in-person and online) Digital Twin Hub community members** from policymakers, corporate asset owners, solution providers, and investors to spark new ideas and business opportunities
- **Experience digital twin technology in an experiential environment** to understand its full potential
- **Understand governance models, open standards** and more through hands-on working groups

Who you will meet

- Policymakers from national government
- Asset owners and operators
- Solution providers who create digital twins
- Investors
- Consultants
- Academics

Key Topics at the Connected Digital Twin Summit

- Overcoming barriers preventing connected digital twins
